

## Breakfast like a king

If you want to make some healthy changes this year - this product could help. Available in three tasty varieties, LoveDean is a fantastic, healthy alternative to the traditional cooked British breakfast. A natural toasted cereal enriched with natural oils and nuts makes it the perfect fuel to kick-start the day, whether you are sat at your desk, luxuriating over an indulgent brunch with friends, or jetting off to the slopes for a day's skiing. Using the finest natural ingredients, the secret recipe is created by toasting oats, pecans, Brazil nuts and hazelnuts with pumpkin, hemp, sunflower and flseeds and a drizzle of honey. LoveDean is additive and preservative-free offering consumers a totally nutritious and delicious breakfast that is low in GI and cholesterol, free of wheat, lactose and GMO yet high in fibre and taste.

*The taste panel loved this product. All the flavours got the thumbs up, though the editor's favorite was the No.3 Breakfast (made with dates and apples), which was delicious with both milk and yogurt, but also made a fantastic snack on its own. "Being healthy will be much easier when the products taste like this!" she said.*
